ASSIGNMENT 2
DATA VISUALIZATION
SPRING 2016

YEILHA VARGAS

The CatvsDog dataset shows a higher household
cat population by state compared to the household population
of a dog despite cats having a smaller population as a whole.

Tools used: app.raw.densitydesign.org, Adobe Illustrator

Dataset found at: https://public.tableau.com/s/resources?qt-overview_resources=

Are people living on the east coast more fond of
cats over dogs in their households?

- I attempted to clean up the data in excel to later put into the data
visualizing software. After doing so, I then continued to clean the
data up again and try different charting methods. The initial
question was also cleaned up in attempt to make the question
more clear.

ARE PEOPLE LIVING ON THE EAST COAST MORE FOND OF OWNING CATS?
